

Solving Business Problems with Information Technology CS100

Standard Class

Learn practical technology and Excel skills. Prior computing experience is not required. Recommended for most students.

Accelerated Class

Hands-on and in-depth learning for students with a strong prior interest in tech or familiarity with Excel. **Sign up for CS100-20-X.**

Honors Class

For students in the Bentley Honors Program only. **Sign up for CS100-19-H.**

Service Learning Option

Participate in a community service learning project as part of the course as a 4th credit option where you can apply your tech skills and help your community. You will hear about it the first week of your course.

LEARN THE TECH SKILLS YOU NEED TO SUCCEED IN BUSINESS

- Learn essential technology skills such as computer concepts and Excel.
- Use business applications to communicate and collaborate within teams.
- Format, analyze, and present data using Excel.
- Make a website using basic programming skills.
- Synch data and devices with the cloud technology while utilizing file management techniques.
- Stay current on technology trends such as Cybersecurity, Artificial Intelligence, and Data Analytics
