This event provides a convenient forum through which you can ask any questions you have about the programs you have been researching. Not sure what to ask? This list of questions may be a helpful starting point:

- 
- What are the program's classes like?
 - Do you have questions about the program's prerequisites/corequisites?
 - Are there particular electives that would align well with your interests/goals?
 - Which skills will the program help you develop?
 - What are some potential career paths with this program?
 - What kinds of internships/jobs have other students in this program completed?

After you conclude your conversation with a department, it may be helpful to make some quick notes that you can refer to later.
