In the next few years, more than 2 million new data analytics jobs will be created, boosting related employment opportunities by a staggering 45 percent. The Bentley Master of Science in Accounting Analytics (MSAA) provides the skills and experience you need to get ahead of the competition in this fast-growing, competitive big data job market.

The high demand for accounting graduates with strong data and analytics skills is the reason why Bentley created a degree for students interested in audit firm practices such as risk management and process assurance. You’ll gain skills in accounting practices and advanced expertise in accounting and auditing, using industry tools to explore data mining and predictive analytics.

Program Features
- Courses from five departments (Accountancy, Computer Information Systems, Finance, Information Process Management, Mathematics) sharing a common core with other MS in Analytics programs.
- Built around eight core competency courses coupled with two focused electives, the degree can be completed in 12 to 18 months.
- AACSB accredited, and the first graduate accounting program of its kind.
- STEM designation, increasing employability of international students due to three years of OPT (optional practical training).

Experiential Learning
Success in today’s business world requires a practical, hands-on approach to information, whether you are analyzing it, integrating it or sharing it. Our high-tech learning labs ensure that you’ll have access to the leading edge of technology, giving you every opportunity to cut your teeth on the equipment and software being used in the business world today. MSAA candidates can take advantage of the Howard A. Winer ’58 Learning Lab for Economics, Accounting and Finance (LEAF), and learn how to manipulate working solutions from real data trends they’ve uncovered.

Career Outcomes
An MSAA prepares you for such careers as:
- Professional accounting
- Internal auditing
- Audit analytics
- Quantitative Analytic Associate
Curriculum

Foundation (6 courses)

All applicants will be evaluated for foundation course waivers.

- AC 611 Financial Accounting Problems I
- AC 612 Financial Accounting Problems II
- AC 730 Business Processes and Systems Assessment
- AC 741 Financial Statement Auditing
- GR 521 Managerial Statistics
- IDCC 620 Managerial Communication

Core (8 courses)
